

To whom it may concern,

It is with great pleasure that I recommend Krische Construction too anyone planning a remodel or a new construction. They completed the project successfully despite many numerous restrictions and delays that were placed upon then by the nature of our profession.

Having to do a total remodel of our property while we were still open and serving customers placed untold constraints on their normal working procedures, but they did so with a minimal inconvenience to our guests and operations. Even after our delaying the project for more than a year, Krische did their best to honor the original pricing and schedule.

All of the people we worked with, from planning and scheduling to the actual workman and supervisors were at all times professional and a pleasure to work with. This was very important to us because of the interaction they had with our guests during the project.

I would have no second thoughts about using Krische again for another project of any size at one of our properties.

Sincerely,

Thomas Elphison
