Attn: Barry LaSalle
From: T*Rex Architex
RE: Letter of Recommendation

To Whom It May Concern:

It is with great honor and respect that I write this letter of recommendation for Krische Construction. I have had the pleasure of working directly with Barry LaSalle and his team for the past year as they brought our design for a gymnasium addition project out of the ground and into a working facility. I have found Krische to be very pleasant to work with and is direct and efficient with solving any issues and problems that may have occurred throughout the construction process.

There are always challenges the design team faces when the project is translated from working construction drawings into building materials and solid forms. Barry and his team did an excellent job in working with us and the client to bring our gymnasium to life. He maintained an excellent timeline for us to work with and completed the project in a timely manner even though working through various weather-related setbacks.

Krische was very thorough with the various project management tasks. Daily updates, weekly submittals, and month-to-month progress reports were all well documented and supplied to the design team. Change orders, requests for additional information, and architectural clarification requests were always processed in a clean and timely manner. Their record keeping and information processing was impeccable and proved useful during project closeout and change-order tracking.

We would welcome additional opportunities to work with Krische Construction in the future should our projects and paths cross again.

Sincerely,

A handwritten signature in blue ink, appearing to read "A. Zimmer", is written over a faint, larger signature.
