Re: Renovation of First Congregational United Church of Christ,
Longmont

Dear Joe:

It is difficult for me to put into words the gratitude and appreciation we have at First Congregational UCC for your work on our recent renovation. The result is outstanding, inspiring, and beautiful! All the comments I have heard from members and visitors have been laudatory and full of praise.

Working with the folks from Krische such as Kenny and your other staff has been a joy. I have not encountered more courteous or gracious people anywhere. Even when under pressure, and often there was pressure, they were kind, gracious and willing to listen to our concerns. The subcontractors were equally gracious and good to work with.

There were situations that were difficult to handle with the design but you always managed to come out shining and on top. As you well know, when you renovate an older building, there are always surprises. You folks were always eager and ready to find a solution to the problems that came up. In fact you often found solutions that were even better than the original plan.

We feel blessed to have worked with all of you and will be delighted to recommend your firm to any other church or business considering you. If we have occasion to need a construction firm again, I am certain that your name will be at the very top of the list.

Sincerely,

Anne D. Kear, Senior Minister
